## Bring Your Own Device (BYOD) Guide

We value the use of technology and the need for today's children to be proficient and intuitive users. At Phoenix House International School (PH), technology, including hardware such as MacBooks and iPads, will be carefully employed in classrooms as an additional learning tool when it enhances learning and develops computing skills.

### **iPad - Description**

Pupils required to bring an Apple iPad as part of the PH 1:1 programme. We have a pupil-owned model based on the Mac operating system. This means that your child will need to own and bring their iPad to school each day, starting on their first full day of school. Pupils must bring their iPad charger if necessary.

### **Device recommendation**

**Apple iPad Air** (10.9-inch, 9th generation, Wi-Fi) with 256GB storage and Apple A12 Bionic chip. You may choose to get a higher specification iPad.

**Apple iPad** (10.2-inch, 9th generation, Wi-Fi) with 256GB storage and Apple A12 Bionic chip. You may choose to get a higher specification iPad.

Effective from August 2023
